

Thank you for reviewing this information we are providing to assist you in selecting a new PACS Work Station Table for your Radiology requirements.

mercatUS International is an outfitter of the technical workspace environment serving the Southwestern United States, Hawaii and Mexico since 1989.

We specialize in design, space planning, installation and sale of technical furniture and related products for today's hi-tech environments. mercatUS International is a Veteran Owned Small Business, and a registered Government Supplier. We have been outfitting major hospitals throughout the United States with PACS Tables for over four years.

Our PACS Work Station Table is electrically height adjustable with a range of 25 $\frac{1}{4}$ " to 41 $\frac{1}{4}$ ". This allows Doctors a sit stand choice at the PACS Work Station. The table features an instant on off one touch control that can be mounted anywhere below the work surface.

Most Work Stations are configured with our Keyboard Mouse Tray combination that features a 9" bi-directional area for the mouse that accommodates a right or left-handed user. There is also a CPU Holder that travels front to back, and can rotate 360 degrees for easy access and wire management. In addition there is a rear cable tray for keeping wires from cluttering the underside of the Work Station. Power outlets strips are provided in either 15 or 20 amp versions.

Finally, as many hospitals have gone to flat panel displays we also offer Flat Panel Arms that make viewing adjustment a snap.

mercatUS International can quickly provide you and your staff the essential design materials and pricing needed to make the sometimes tedious and timely decisions needed in your fast pace workplace environment. We are here to help make your job more ergonomically safe and enjoyable. Thank you for considering mercatUS International for your PACS Table solution.
